

SUSTAINABILITY **CUSTOMER** **OVERVIEW**

Honeywell

At Honeywell, we have a long history of improving our own environmental and sustainability profile while providing innovative products and services that support our customers in meeting their environmental goals.

Honeywell committed this year to become carbon neutral in its operations and facilities by 2035. Since 2004, we have driven a more than 90% reduction in the greenhouse gas intensity of our operations and facilities.

As essential products in the Life Sciences value chain, Aclar® films and Aclar Edge™ bottles protect drugs that improve the lives of individuals throughout the globe by

providing the moisture barrier protection needed for drug stability and patient safety. As sustainable practices continue to be vital for furthering these efforts, we are developing separation processes to enable post-patient collection and recovery of healthcare packaging.

DISCOVER MORE ABOUT OUR COMMITMENT TO A SAFER AND MORE SUSTAINABLE FUTURE THROUGH OUR ACLAR PORTFOLIO

THE ACLAR® PORTFOLIO CARBON FOOTPRINT HAS IMPROVED BY OVER

50%
SINCE 2012

WASTE FROM ACLAR FILMS PRODUCTION HAS BEEN REDUCED BY

29%
over a 5-year period

REDUCE PACK SIZE, SECONDARY PACKAGING AND TRANSPORTATION COSTS UP TO

55%
